Subject: FW: Keep the Sun Shining

Dear Ms. Boyd,

I appreciate the determination of the Public Service Commission to talk about solar energy and I know that the PSC has been asked to delay its September 12th workshop on solar and net metering until possibly the new year in order to allow an advisory committee time to complete its recommendations on how to account for future solar growth. While that work is important, I think it's necessary to continue the public discussion on how existing rules can be improved to allow for limited amounts of solar competition right now. Many other states have already taken these modest steps.

I would encourage the PSC to hold the scheduled meeting on the 12th of September; the issue is far too important to the people of South Carolina to postpone it any longer. If you have any questions, I can be contacted at the addresses and numbers below.
